PROFILE

Backend engineer with 4+ years of experience building high-performance, distributed systems in Golang, Java, and TypeScript/Node.js. Specialises in real-time event streaming, event-driven microservices, and continuous-flow data pipelines using Apache Kafka, gRPC, and WebSockets. Proven track record designing and operating cloud-native infrastructure on AWS with Terraform and Kubernetes. Holds AWS Certified Cloud Practitioner and AZ-900 certifications.

WORK EXPERIENCE

Backend Software Developer – Bemobi | *May 2025 – Present* | *Rio de Janeiro, Brazil*

- Architected and maintained real-time event streaming pipelines with Apache Kafka — owning partitioning strategies, consumer-group tuning, schema governance, and dead-letter-queue handling to achieve sub-second end-to-end latency at scale.
- Designed gRPC and REST APIs in Golang and Java for high-throughput inter-service communication in a microservices architecture, enforcing proto-contract versioning and backward compatibility.
- Provisioned and operated AWS infrastructure (EKS, ECS, S3, RDS, Lambda) with Terraform, applying security-first and cost-optimisation practices; managed Kubernetes lifecycle including rolling updates and HPA autoscaling.
- Drove event-driven patterns (pub/sub, CQRS, event sourcing) across teams to reduce coupling and scale consumers independently; automated ops tooling in Python and monitored system health via Grafana and Prometheus.
- Accelerated backend development with agentic AI workflows, using Claude Code (MCP servers, skills, slash commands) alongside Gemini and local Ollama models.

Backend Developer – AtlasIntel | *Oct 2024 – Apr 2025* | *Rio de Janeiro, Brazil*

- Developed backend applications and automations in TypeScript and Node.js for opinion-poll processing and reporting, built on REST APIs, SQL, and AWS; proposed and shipped new product features for the startup.
- Applied TDD with Jest and Postman, maintaining the codebase in line with company engineering standards and business rules.

Fullstack Software Developer – Flextronics Institute of Technology | *Oct 2022 – Sep 2024* | *Sorocaba, Brazil*

- Built Golang microservices for continuous-flow data ingestion with high throughput, low latency, and graceful backpressure; delivered real-time features via WebSockets and RabbitMQ/ActiveMQ for live dashboards and push notifications.
- Managed containerised workloads with Docker and Kubernetes and GitHub Actions CI/CD pipelines for zero-downtime deployments, backed by TDD unit and functional test suites.
- Delivered Angular frontends consuming REST and gRPC backends, and cross-platform mobile apps with Python (Kivy).

Fullstack Software Developer – Capgemini | *Jul 2021 – Aug 2022* | *Salvador, Brazil*

- Developed event-driven backend services in Golang and Java, integrating Kafka and JMS queues to process high-volume financial transactions under Brazilian Central Bank standards.
- Built gRPC and REST APIs with service-mesh patterns for resilient, observable communication, plus Angular frontends — owning delivery end to end with TDD and high code coverage.

TECHNICAL SKILLS

Languages: Go/Golang (primary), Java, Python, JavaScript/TypeScript, Node.js, SQL

Streaming & Messaging: Apache Kafka (partitioning, consumer groups, schema registry), gRPC, WebSockets, RabbitMQ, ActiveMQ, JMS

Cloud & Infrastructure: AWS (EKS, ECS, S3, RDS, Lambda), Terraform (IaC), Kubernetes, Docker, Ansible, Azure

Event-Driven Patterns: Event sourcing, CQRS, pub/sub, saga pattern, outbox pattern

Observability: Prometheus, Grafana, distributed tracing, structured logging

Databases: PostgreSQL, MySQL, MongoDB, Redis

CI/CD & Tooling: GitHub Actions, Jenkins, Git, Linux, Jest, Postman

Frontend: Angular, React (personal projects), React Native

Practices: Clean Architecture, TDD, Microservices, DevOps

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- AZ-900: Microsoft Azure Fundamentals
- Scrum Foundation Professional Certificate (SFPC)

EDUCATION

Master's Degree in Computer Science – Federal University of Bahia | *Jan 2025 – Present*

Science and Technology (Undergraduate) – Federal University of Bahia | *Aug 2019 – Jun 2021*

LANGUAGES

Portuguese (Native) | English (C1) | Spanish (C1/C2) | French (B1) | German (A2)
